

The Foss Fairy Trail started in the 2021 Covid lockdown when Tracy discovered fairy doors on a walkway by the River Foss, She started to make fairy houses and placed them all along the trail. It quickly turned into the Foss Fairy Trail after she applied for local funding and got support from volunteers and the community. It was then discovered that it was Lisa who created fairy doors and put them on the walk by the river to spread joy. **Meet the Fairies M** the Fairies Meet th **Fairies Meet the Fa** ies Meet the Fairie **Meet the Fairies M** the Fairies Meet th **Fairies Meet the Fa** ies Meet the Fairie **Meet the Fairies M** In the Fairy Trail there are a wide variety the Fairies of different fairies and each type has an important role in our forest. We have three main kinds of fairies fluttering around on

our trail, look right to find out more!

These are the most common fairies on the fairy trail. Forest fairies are a kind of Pixie, they like to collect things such as acorns and leaves as well as doing their duty of preserving the forest. They're the smallest and craftiest fairy in the forest, remember to keep a look out!

Flower fairies are the most stylish fairies in the forest, they like to hide in flowers and make their clothes out of petals. Watch out as they may steal your most fashionable items of clothings without you knowing. Their job is to make sure the flowers can grow to their fullest so the foret stays beautiful.

Be quiet around mushroom fairies, they're very shy and easily scared but once you've made friends with them they'll never leave your side. Their job is to keep a balance between the mushrooms and make sure the poisonous mushrooms and fungi don't infest the forest whilst keeping the safe mushrooms healthy.
